

At the joint edge of Cellular Microbiology & Cell Biology

20 - 25 September | 2008
Villars-sur-Ollon | Switzerland

Speakers

Patricia Bassereau, Paris, France

Frances Brodsky, San Francisco, USA

Barbara Burleigh, Boston, USA

Valeria Cavalli, Washington, USA

Jean Celli, Montana, USA

Pascale Cossart, Paris, France

Antonella de Matheis, Italy

Vojo Deretic, USA

Ivan Dikic, Frankfurt, Germany

Marcos Gonzales-Gaitan, Geneva, Switzerland

Jean Gruenberg, Geneva, Switzerland

Volker Heussler, Hamburg, Germany

David Holden, London, UK

Ira Mellman, USA

Marta Miaczynska, Warsaw, Poland

Paul Lehner, Cambridge, UK

Emmanuel Lemichez, Nice, France

K. Orth, Dallas, USA

Lucas Pelkmans, Switzerland

Vincent Piguet, Geneva, Switzerland

Simona Polo, Milano, Italy

Anne Ridley, London, UK

Erec Sebbin, New York, USA

Harald Stenmark, Oslo, Norway

Natalie Strynadka, Vancouver, Canada

Linda Stuart, Boston, USA

The purpose of the conference is to bring together
frontline research in two separate areas,
cellular microbiology and cell biology

*To understand the mechanisms by which pathogens
attach to, enter, move within and multiply inside cells,
allowing spreading and disease establishment, a good
understanding of processes that govern the organization
and physiology of the target cell is essential.*

*On the other hand, pathogens are the ultimate
cell biologists, and much is to be learned
from them about how the cell functions
and what are its weak spots.*

Organisers

Gisou van der Goot (Chair)

Ecole Polytechnique Fédérale de Lausanne
Lausanne, Switzerland

Ivan Dikic (Vice-Chair)

Goethe University School of Medicine
Frankfurt, Germany

Co-sponsors

 syngenta

 MERCK
SERONO

 Roche

 NOVARTIS

 FNSNF
SWISS NATIONAL SCIENCE FOUNDATION

* Awards will be given for the best
posters presented by a student
and by a postdoctoral associate

Deadline for applications : April 15th, 2008
