

- Shuttle Bus Information -
EMBO Conference on Nuclear Structure & Dynamics

We have organized shuttle buses from and to Marseille Airport and Avignon TGV train station. These buses are operated by a company called "Arnaud voyages", whose name is printed on each company bus. To further help finding your bus, the name of the conference (EMBO Conference on Nuclear Structure & Dynamics) will be written on the windscreen.

We have also enclosed at the end of this document 2 sample photographs of company shuttle buses. Please kindly note or print the following information and have it at hand on arrival.

➡ **Participants arriving at Avignon TGV Train station:**

For the participants arriving at the Avignon TGV train station, the Shuttle bus will be outside the north exit of the train station, near the Taxi area.

In the figure below, you have the station floor plan to help you locate the bus parking area:

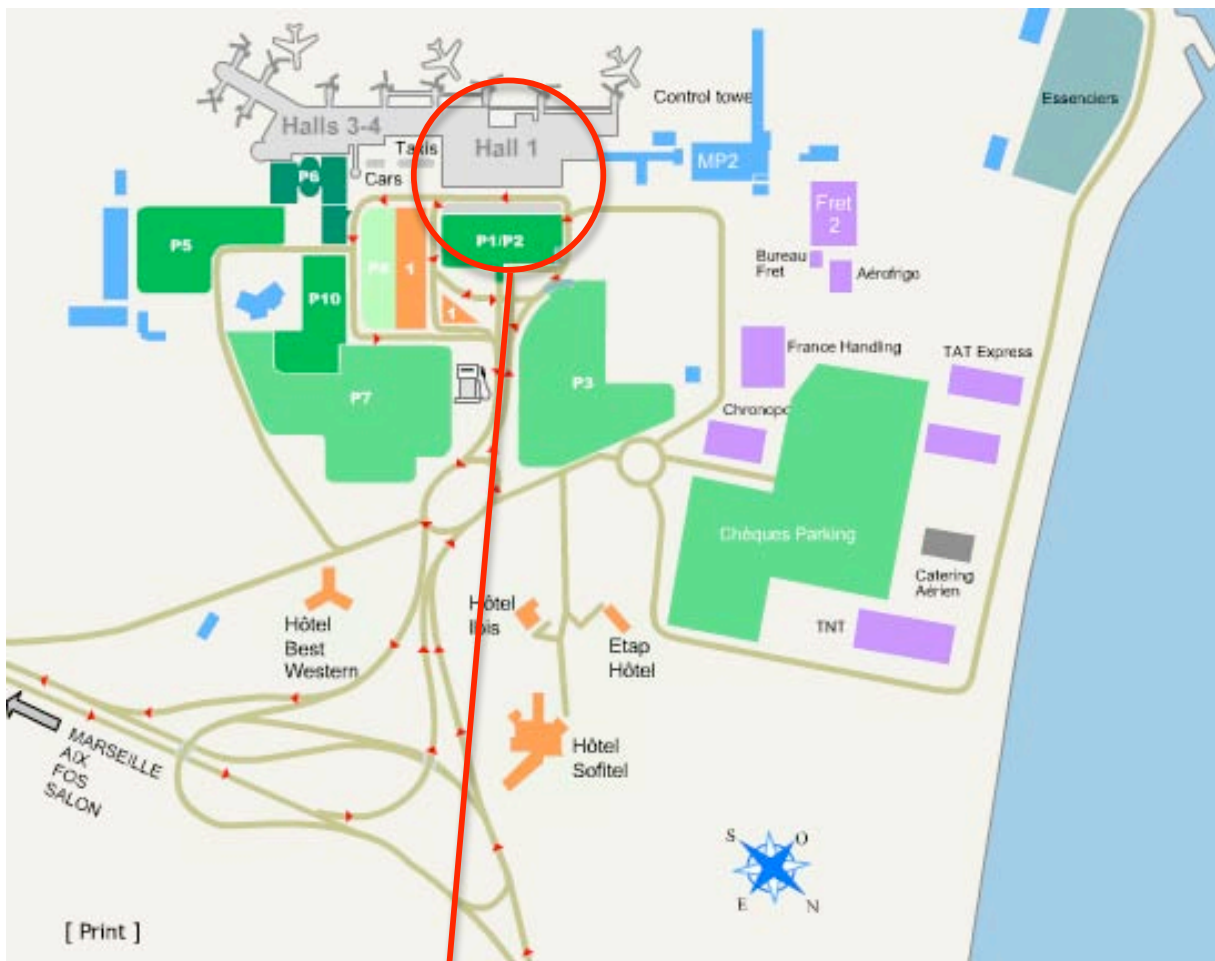

The Shuttle bus that you have previously booked will be waiting for you.

➡ **Participants arriving at Marseille Marignane Airport:**

Since the Marseille Marignane Airport is rather big, we organized a dedicated "Meeting Point". An Airport Hostess will be waiting for you in hall 1 at a reception desk (see sample photograph at the end of this document). The meeting reception desk will be at the Airport meeting point area. If you get lost, please ask your way at the Airport general information desk (there is one in each Airport hall).

The map below will help you to locate the dedicated meeting point:

You will then take the Shuttle bus that you have previously booked to go to the “Domaine de Mousquety”.
