

MOLECULAR APPROACHES to EVOLUTION & DEVELOPMENT

30 June - 12 July | 2008

Fiskebäckskil | Sweden

Chief objective of this course is to teach new molecular techniques in non-conventional animal models to students and postdocs in the evo-devo field.

Major experimental focus will be on RNAi techniques, transgenesis, microinjection and wholemount in situ stainings.

Moreover, all participants will conduct a DNA barcoding experiment on environmental samples to explore the local phylogenetic diversity.

Organiser

Detlev ARENDT
Developmental Biology Unit
European Molecular Biology Laboratory (EMBL)
Heidelberg, Germany

Co-Sponsor

TEACHERS

Michael AKAM
University of Cambridge
United Kingdom

Detlev ARENDT
EMBL
Heidelberg, Germany

Maria Ina ARNONE
Stazione Zoologica Anton Dohrn
Naples, Italy

Michalis AVEROF
Inst. Mol Biology and Biotechnology (IMBB)
Iraklio Crete, Greece.

Graham BUDD
Uppsala University
Uppsala, Sweden

Richard COPLEY
Wellcome Trust Centre for Human Genetics
Oxford, England

Wim DAMEN
University of Cologne
Köln Germany

Claus NIELSEN
Zoological Museum
Copenhagen, Denmark

Ulrich TECHNAU
University of Vienna
Vienna, Austria

Max TELFORD
University College London
London, England

Ernst WIMMER
University Göttingen
Göttingen, Germany

Assistant Teachers

Sarah J. Bourlat, Stockholm, Sweden

Gregor Bucher, Göttingen, Germany

Josh Coulcher, London, England

Rob Lanfear, London, England

Anastasios Pavlopoulos, Cambridge, England

Niko Prpic, Göttingen, Germany

Kate Rawlinson, London, England
