The workshop will focus on the biology and translational medical aspects of Hedgehog-Gli pathway in cancer, linking the most recent insights on the mechanisms of signaling, developmental biology and cancer stem cells. The main objective is to bring together scientists who have been working on this crucial regulatory network from different perspectives.

**Topics**
- Hedgehog-Gli signaling mechanisms
- Hedgehog-Gli in development and stem cells
- Hedgehog-Gli in cancer and cancer stem cells: brain tumors
- Hedgehog-Gli in cancer and cancer stem cells: skin cancer
- Hedgehog-Gli in cancer and cancer stem cells: other tumors
Deadline for applications and abstract submission: June 1st, 2006. Two poster sessions will be dedicated to discussion of abstracts and a number of them will be selected for oral presentation. Submission to: http://w3.uniroma1.it/embo_hedgehog/
