

Awarded the 2008 EMBO Title:

'Molecular Medicine Workshop'

# MHC Class I Molecules at the interface between Biology & Medicine

4-6 July | 2008  
Porto | Portugal

The purpose of this workshop is to bring together researchers that have in common a basic interest in the biology of MHC class I molecules but are studying different, very often unrelated, aspects of the same molecules.

The workshop will provide a forum to bring together distinguished scientists from around the world to review and discuss openly the latest progress and developments in the biology of MHC class I molecules and to discuss future strategies to clarify the role of MHC class I in health and disease.
