»The workshop will cover the latest developments in the functions of RNAs, with a strong focus on bacterial RNAs, which regulate virulence, and on eucaryotic macro RNAs, which are involved in shaping chromatin structure and regulating epigenetic phenomena. We will include all major organisms, from bacteria and ciliates to plants and mammals.«

Scientific Organisers

Renée Schroeder

(Max F. Perutz Laboratory, Vienna, Austria)

Denise Barlow

(CEMM, OEAW, Vienna, Austria)

Eric Westhof

(IBMC, Strasbourg, France)

Speakers

Karen Adelman

(NIEHS, NIH, Bethesda, USA)

Joel Belasco

(Skirball Institute of Biomolecular Medicine, New York, USA)

Olivier Bensaude

(Ecole Normale Supérieure, Paris, France)

Elena Conti

(Max-Planck-Institut für Biochemie, Munich, Germany)

Pascale Cossart

(Institut Pasteur, Paris, France)

Edith Heard

(Curie Institute, Paris, France)

Ivo Hofacker

(University of Vienna, Austria)

Jennifer Kugel

(University of Colorado, Boulder, USA)

Marjori Matzke

(Gregor Mendel Institute, Vienna Austria)

Danesh Moazed

(Harvard Medical School, Boston, USA)

Kazufumi Mochizuki

(IMBA, Vienna, Austria)

Evgeny Nudler

(New York University, USA)

Nick Proudfoot

(University of Oxford, UK)

Pascale Romby

(IBMC, Strasbourg, France)

Stefan Schöftner

(CNIO, Madrid, Spain)

Bertrand Seraphin

(CNRS, Centre de Génétique Moléculaire, Gif sur Yvette, France)

Gisela Storz

(National Institutes of Health, Bethesda, USA)

Henry Tiedge

(SUNY Brooklyn, USA)
