

# LYMPHATIC & BLOOD VASCULATURE:

## From Models to Human Disease

4 - 5 June, 2009

Biomedicum Helsinki

Helsinki | Finland

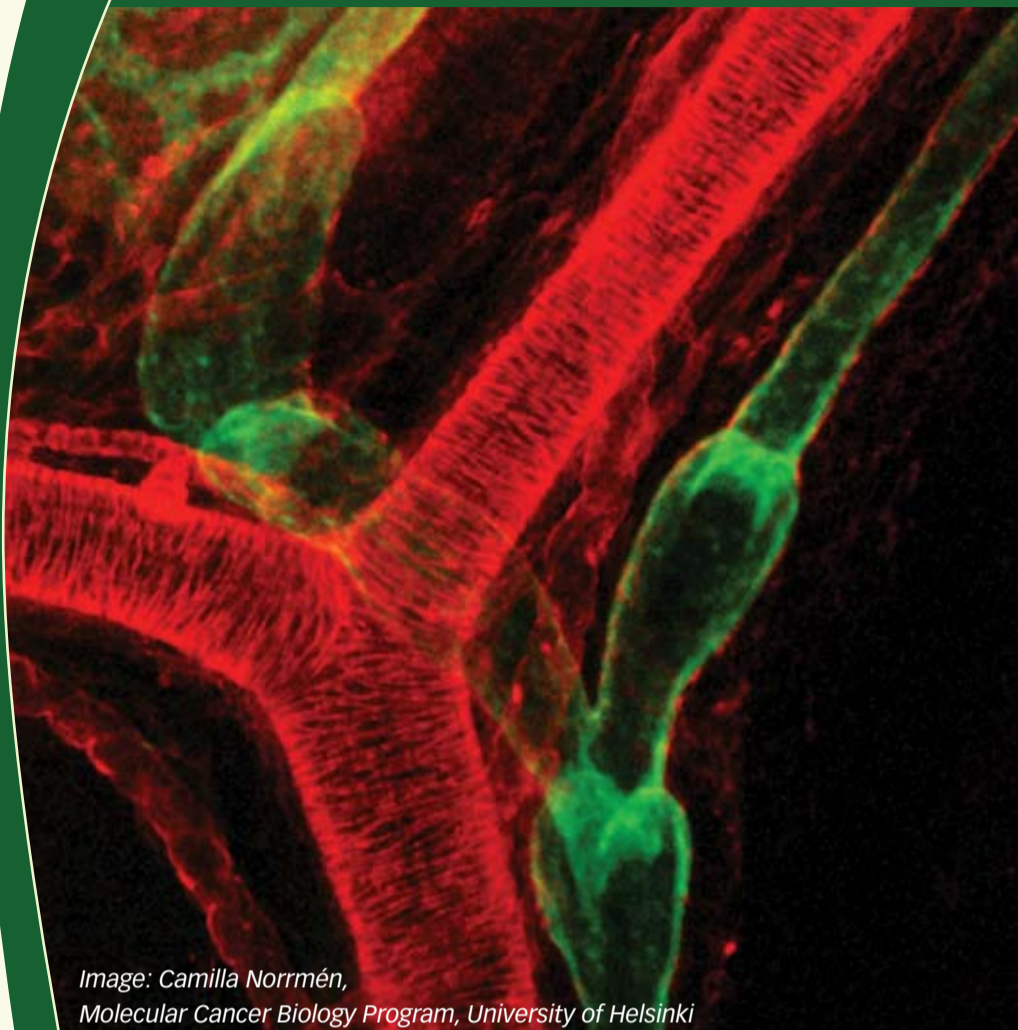

Image: Camilla Norrmén,  
Molecular Cancer Biology Program, University of Helsinki

### TOPICS:

- Mechanisms of blood and lymphatic vascular development
- Vascular patterning and morphogenesis
- Xenopus and zebrafish as models for vascular development
- Advanced imaging techniques
- Stem cells and vascular lineages
- Vascular gene therapy

### ORGANISERS

**Kari Alitalo**

Biomedicum Helsinki, Helsinki, Finland

**Christer Betsholtz**

Karolinska Institutet, Stockholm, Sweden

**Anne Eichmann**

College de France, Paris, France

**Tatiana Petrova**

University of Lausanne, Lausanne, Switzerland

\* Early registration & abstract submission  
notification deadline: March 1st, 2009

Final deadline: April 6th, 2009

### SPEAKERS

Ralf Adams (Münster)

Kari Alitalo (Helsinki)

Hellmut Augustin (Heidelberg)

Christer Betsholtz (Stockholm)

Peter Carmeliet (Leuven)

Lena Claesson-Welsh (Uppsala)

Elisabetta Dejana (Milan)

Anne Eichmann (Paris)

Ulf Eriksson (Stockholm)

Holger Gerhardt (London)

Luisa Iruela-Arispe (Los Angeles)

Gou Young Koh (Daejeon)

Christine Mummery (Leiden)

Taija Mäkinen (London)

Päivi Ojala (Helsinki)

Guillermo Oliver (Memphis)

Tatiana Petrova (Lausanne)

Stefan Schulte-Merker (Utrecht)

Jun Yamashita (Kyoto)

Seppo Ylä-Herttuala (Kuopio)
