LYMPHATIC & BLOOD VASCULATURE:

From Models to Human Disease

4 - 5 June, 2009

Biomedicum Helsinki

Helsinki | Finland

TOPICS:

- Mechanisms of blood and lymphatic vascular development
- Vascular patterning and morphogenesis
- Xenopus and zebrafish as models for vascular development
- Advanced imaging techniques
- Stem cells and vascular lineages
- Vascular gene therapy

ORGANISERS

Kari Alitalo

Biomedicum Helsinki, Helsinki, Finland

Christer Betsholtz

Karolinska Institutet, Stockholm, Sweden

Anne Eichmann

College de France, Paris, France

Tatiana Petrova

University of Lausanne, Lausanne, Switzerland

SPEAKERS

Ralf Adams (Münster)

Kari Alitalo (Helsinki)

Hellmut Augustin (Heidelberg)

Christer Betsholtz (Stockholm)

Peter Carmeliet (Leuven)

Lena Claesson-Welsh (Uppsala)

Elisabetta Dejana (Milan)

Anne Eichmann (Paris)

Ulf Eriksson (Stockholm)
